

Scrum Meeting Notes - Week 10

In this meeting we did a general review of everything we have and what we need to finish the project. According to what was said in the meeting, these are the tasks that we are missing and that each member of the team has to perform.

1. The design of the website is finished except for the LRG members page, where they will have access to the content of the page and in this way they can edit it. Task assigned to Sandro.

2. The front end of the website is partially functional, some adjustments are still needed. Task assigned to Selena.

3. The presentation video has to be started and finished this week. Selena will be in charge of recording her voice for the video script and Viktoria will build the video for the presentation.

4. The back end of the website continues in process, the login and the CMS for the edition of the content of the site will be built this week by Elena. Also it is necessary to build a table in the database for LRG members information to be displayed on the website.

5. There is missing information for a page of the website. Looking for officials page is empty, you need to collect this information, you also need to create the event marketing strategy for the presentation. This will be done by Andres.
