

Meeting Notes Week 10-3

We have the project done and will be working on the last details!!

Task each team member will be working on:

Sandro:

He already made the images for the whole website, now he will be working on some mockups for the custom promotional products that are included into the event marketing plan. Also he will work on some 'employee cards' instead of the pictures of the actual employees because they did not provide any images. He will also make the favicon for the website.

Elena:

She is working in the back-end and already has the functionality done; the code is 80% done. some errors to fix but the CMS is completed and really well done. This is like half of our project so she will be working hard on this.

Selena:

She will connect Elena's back-end functionality with the front end of the project. Also she has the web site running in heroku so it is live!. The exclusive section for LRG members to edit, add and delete content will be styled by Selena as well.

Viktoria:

She already has the voice for the script, and she already edited the beginning of this. She will be working on the video.

Andres:

I have to add Custom promotional products to the event marketing plan and so on the script to be added to the video presentation, I also will make some mockups for the event marketing and some products with Sandro, such as hoodies, caps and t-shirts.
